21CK Company Overview

21CK is a leading provider of IT solutions and services, established in 2007. We specialize in offering advisory evaluation studies to business partners, designing effective and innovative solutions to meet their specific needs. Our journey has been marked by continuous, steady steps of hard work, leaving a distinctive mark on every project we have been honored to implement. We always strive for meticulous attention to detail through clear business plans.

Mission

To be the premier provider of information technology solutions and services for various business sectors, focusing on the needs of medium-sized enterprises while also offering specialized solutions for large corporations. We aim to be the preferred partner by creating high value for business partners across different specialties and categories, while reducing overall operational costs.

Vision

To be a leading company leveraging our Gulf Arab heritage towards globalization, focusing on growth, quality, and innovation through the application of best practices, management, and advisory methodologies. We aim to help our partners, especially medium-sized enterprises, expand their businesses while also providing tailored solutions for large corporations.

Our Values

- ✓ High Value: We strive to enhance the value of our partnerships with business partners.
- ✓ Passion for Our Customers: We reassure our customers by providing outstanding business solutions and services.
- ✓ Innovation: We foster a culture of innovation and enjoy collaborating with business partners.
- ✓ Respect: We value cultural diversity, respect, and support each other.
- ✓ Integrity: We communicate openly and honestly, delivering on our promises.
- ✓ Excellence: We think and act decisively, continually striving to achieve greater efficiency with the right people in the right jobs. We reward outstanding performance and take resolute action against misconduct.

Commitment to Excellence

At **21CK**, we fully believe that the path towards success is the journey of life itself. Living in a new and rapidly changing world, governed by science and knowledge, is essential to adapt, thrive, and compete. Global standards have become very close, especially in technology and information technology, as well as in contemporary practical life applications across various sectors such as security, health, education, training, economics, social sciences, and other aspects of life.

Given the importance of the information technology sector with its various specializations, we at 21CK group are blessed with highly qualified, efficient, and distinguished manpower at the administrative and technical advisory levels. We are committed to providing solutions to your technical, operational, and administrative problems in a professional manner, according to the highest international standards of quality and efficiency. By applying the latest administrative systems in the management of facilities and projects alike, we aspire to achieve our vision not only to expand locally and regionally but also to reach a global level, God willing.

By focusing on the specific needs of medium-sized enterprises while offering specialized solutions for large companies, we aim to provide comprehensive IT solutions that drive business success across all sectors.

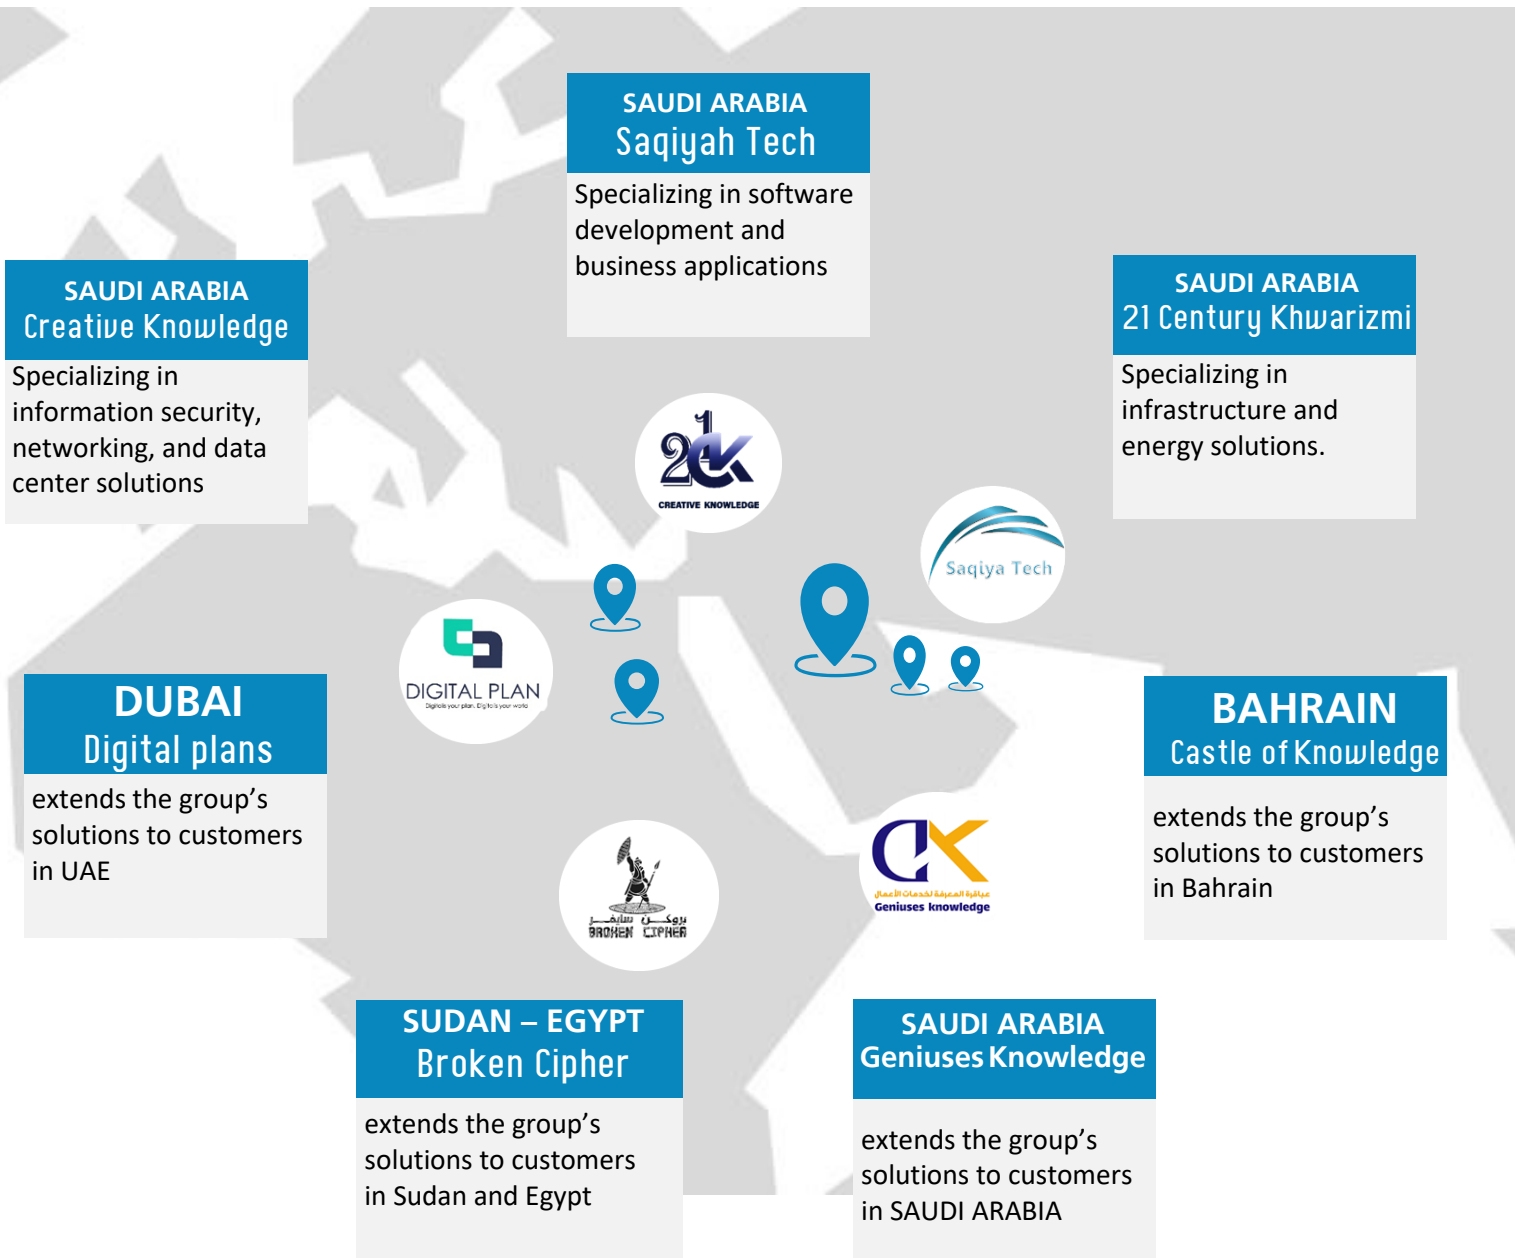

Our Services and Solutions?

21CK offers consultation, integration, support, and improvements to ensure your IT infrastructure and strategic direction are perfectly aligned. We collaborate with companies that value technology and seek to maximize their investments in the information technology sector. Our expertise in IT consulting and integration, combined with our dedication to pre-sales support, ensures that every project is successfully completed on time and within budget, following global project management standards and principles.

Around the World

21CK is composed of several subsidiary and affiliated companies to provide integrated solutions across multiple domains:

Cybersecurity Services

At **21CK**, we understand that effective cybersecurity requires a tailored approach, uniquely configured to address the specific threats and challenges each organization faces. Our expert team designs bespoke security architectures that integrate seamlessly with your business requirements and the ever-changing landscape of cyber threats.

Data Center Solutions

- **Servers and Storage:** Providing advanced server appliances and secure storage solutions to ensure data protection.
- **Servers:** Utilizing a range of server types, including blade, rack, and tower servers, to provide scalable and efficient computing solutions.
- **Storage and Backup Solutions:** Implementing comprehensive data storage solutions, including SAN, NAS, and object storage systems, paired with robust backup strategies to ensure data integrity and recoverability.
- **Virtualization:** Leveraging virtualization technologies to create simulated environments, reducing physical hardware costs and increasing deployment flexibility.
- **Hyper-Converged Infrastructure (HCI):** Integrating computing, storage, and networking into a single system to simplify management and enhance scalability and performance.
- **Data Centers:** Designing and securing environments that support traditional, micro, and mini data centers. Each type is tailored to different scale requirements, from large-scale enterprise data centers to compact solutions ideal for small businesses or remote operations.
- **Micro Data Centers:** Offering compact, modular solutions that provide the benefits of a conventional data center but in a smaller, self-contained unit. Ideal for edge computing needs and rapid deployment in environments with limited space.
- **Mini Data Centers:** Slightly larger than micro data centers, these solutions are perfect for businesses that require more capacity and scalability but still need a smaller footprint than traditional data centers.

21CK Business Development Solutions

At 21CK, we specialize in enhancing the efficiency of ready-made administrative software and ERP systems such as Odoo, Zoho, Microsoft Dynamics, Oracle, and more. We achieve this by optimizing their performance to the highest possible degree and integrating additional programs to meet various needs. We utilize business intelligence modules like Power BI and QlikView to achieve the best results, along with artificial intelligence programs to streamline business performance. With our Business Development Solutions team in our offices across Saudi Arabia, Egypt, and the UAE, and in collaboration with several specialized companies for programs not available within our internal team, we provide the best solutions to meet your needs.
